

E.F.E. tooling 2019

Routemaster facelift

Updated Routemaster tooling from E.F.E. by Bachmann.

The E.F.E. 1:76/00 scale Routemaster series captures the elegant lines of this design classic very well. We want to make the E.F.E. Routemaster even better, and with the help of our friends at the Routemaster Association we are undertaking various modifications to the tooling for 2019.

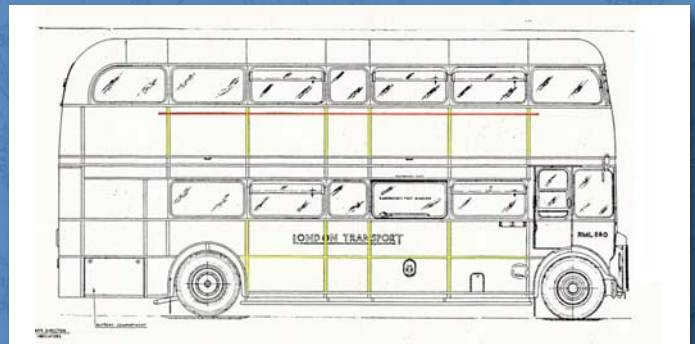

Panel ribbing detail will be added to the upper and lower decks, and various detail enhancements to the tooling will be made where possible.

Current progress on the 'RML' type as at November 2018 is shown below.

BEFORE modification

Existing RML casting does not have panel rib detail.

General Arrangement drawing highlighting the tooling adjustments on the RML casting.

AFTER modification

Test casting showing panel rib detail on both decks.

More info coming soon.
